

NOTICE OF PUBLIC MEETING

Comprehensive Energy Outlook in Maryland

The Maryland Energy Administration is developing a Ten Year Comprehensive Energy Outlook (CEO) to help ensure the availability of reliable, affordable and clean renewable energy for all Maryland citizens. The CEO will be an executive report that profiles Maryland's energy supply and demand picture for each of our basic fuel sources, the electric and gas industry, and the transportation sector. The report will identify critical energy issues that the State is facing or could face, and will recommend potential solutions that will have real world value.

MEA will be hosting this first of several meetings to discuss Maryland's energy supply and demand picture.

The first meeting will be held on:

Friday, July 31, 2009
1pm to 5pm

The House of Delegates building, Room 170
Annapolis, Maryland

The meeting is open to all interested parties, but visitors will require photo identification for access to the House of Delegates Building. Interested persons are invited to review materials posted on the MEA website, which will be posted prior to the meeting, attend the meeting and offer comment starting at 4:00 PM. Individuals will be asked to limit their oral comments to two (2) minutes; however, written comments will be accepted by email to MEA at meainfo@energy.state.md.us.

When submitting an email, please use the subject line

“Comprehensive Energy Outlook ” to ensure proper routing and delivery.
